DoD	DON	Guidelines for Permitting Archaeological Investigations and Other Activities Directed at Sunken Military Craft and Terrestrial Military Craft under the Jurisdiction of the Department of the Navy	0703-AA90	This rule revised 32 CFR part 767. The rule established a single permitting process for members of the public wishing to engage in activities on Department of Navy sunken and terrestrial military craft. The rule also incorporated provisions for a special-use permit to be issued in the case of minimally intrusive operations such as sample collection or remotely-operated vehicle documentation of historic sites. Also the rule outlined penalties and enforcement procedures.	Completed	Final rule published on 31 August 2015 (80 FR 52587) with an effective date of 01 March 2016.	Streamlined Requirements by updating existing guidance.	Public Comment	The rule provided an avenue for the public to access sites that are otherwise restricted from disturbance by the SMCA. Such access will allow research that can bring to light new information about the nation's maritime heritage and increase public knowledge of the US Navy's history and service.
DoD	OASD(PA)	DoD Assistance to Non-Government, Entertainment-Oriented Media Productions	0790-AI90	This rule established policy, assigned responsibilities, and prescribed procedures for DoD assistance to non-Government entertainment media productions such as feature motion pictures, episodic television programs, documentaries, and computer-based games. It provided substantially increased oversight of production support at a higher headquarters and DoD level. A number of important improvements in policy were made to ensure appropriate levels of approval, production support, and oversight. DoD	USD(P&R)	Limitations on Terms of Credit Extended to Service Members and Dependents	0790-AJ10	The DoD amended its regulation that implements 10 U.S.C. 987, known as the Military Lending Act (MLA). As part of the Administration's ongoing efforts to support service members and their families, the DoD issued changes to significantly expand the definition of consumer credit covered by the MLA. The revision is designed to apply the protections of the MLA to all forms of payday loans, vehicle title loans, refund anticipation loans, deposit advance loans, installment loans, unsecured open-end lines of credit, and credit cards. The MLA provides specific protections for active duty service members and their dependents in consumer credit transactions. The regulation caps the interest rate on loans to active duty service members at 36 percent, requires disclosures to alert service members to their rights, and prohibits creditors from requiring a service member to submit to arbitration in the event of a dispute, among many other protections.	Completed	Final Rule published 22 July 2015 (80 FR 43560). Final Rule effective 1 October 2015. Compliance required by 3 October 2016.	Yes. The Rule utilizes safe harbor provisions exemptions, potential phase-in periods for compliance and other similar measures.	Public Comment and meetings with stockholders	DoD anticipates that, absent any relief under § 232.13(c), its regulation might impose costs of approximately \$106 million during the first year, as creditors adapt their systems to comply with the requirements of the MLA and DoD's regulation. When the relief afforded to creditors for the general exemption for credit card accounts is included, then the anticipated approximate costs would be significantly lower during the first year. After the first year and on an ongoing basis, in a sensitivity analysis, the annual benefits to DoD may be between approximately \$14 to \$133 million. DoD estimates the potential savings that could result if the rule reduces the involuntary separations of Service members where financial distress is a contributing factor in sensitivity analyses; at some points in the range of estimates DoD has used to assess the proposal, these savings are estimated to exceed the compliance costs that would be borne by creditors. DoD also has developed a transfer payment analysis that estimates between \$100 and \$119 in transfer payments per year from creditors to service members and their dependents.
DoD	DOA/COE	Defining the Term "Waters of the United States"	2040-AF30 (joint rule with EPA)	The rule clarified the definition of the term "waters of the United States" under the Clean Water Act (CWA), and thus which waters are subject to the various provisions of the Act. The rule provided more certainty and predictability to the regulated public as well as Corps regulators as to the jurisdictional status of waters for all sections of the CWA, including section 404. It will also reduce delays for jurisdictional determinations requested by landowners by providing greater efficiency for agencies and the regulated public.	Completed	Final rule was published in the Federal Register on 29 June 2015 (80 FR 37054) and was effective 28 August 2015. However, the Sixth Circuit issued a nationwide stay of the Clean Water Rule on 09 October 2015. Until the stay is lifted and/or a court decision states otherwise, the Corps is applying the 1986 regulations, 2003/2008 guidance documents for determining jurisdiction under the Clean Water Act.	Streamlined requirements and more clarity and efficiency in jurisdictional determinations.	Public comment period ended on 14 November 2014. The draft final rule also went through a round of OMB/interagency review.	The rule provided greater clarity to the regulated public regarding which waters are jurisdictional. Costs may be incurred by the Corps from additional workload efforts for any needed database changes, developing and providing training to field staff, outreach to the regulated public and consultant community, and potential slight increase in jurisdiction which may result in increased permit workload. However, the efficiencies and clarity gained in making jurisdictional determinations should help offset the slight increase in jurisdiction.

The Corps revised the regulation to increase the pre-construction notification review period to 45 days, to be consistent with the current nationwide permits. The Corps also amended the regulation to allow district engineers to issue verification letters that can have the same expiration date as the nationwide permit.	Completed	Final rule published on 28 January 2013 (78 FR 5726) with an effective date of 27 February 2013.	The NWPs streamline permit requirements by providing expedited authorization for projects that are minimally impacting both individually and cumulatively.	Public Comment	The effort will reduce burdens on permittees by clarifying that only one NWP verification is needed every five years. Also provides simplicity and clarity to the regulated public.

The DD Form 1640, Request for Plant Clearance, is for Government use only; therefore, the 13 burden hours associated with this form is removed.
